Recommendations/Requirements

Backings need to be 4- 6 inches wider and longer than your quilt top.
Pressing and trimming excess fabric from seams will help improve the overall appearance of the finished quilt.

Calculating Square Yards

Multiply the width in inches and the length in inches.
Divide that total by 1296 to equal the number of square yards.

Scheduling

There are times of the year when the backlog of machine quilting requests will increase dramatically. Just before county and state fairs, weddings and graduations and the holiday season, we may not be able to get to your quilt as soon as you would like. Planning ahead is essential for those special occasions.

Long arm quilter recommendations

To serve all our customer the best we can, there are times we may recommend that you have your project quilted by one of our quilting colleagues in the area. Many of them specialize in very complex quilting designs that have won prizes in state fairs and at the level of regional and national quilting shows.

If we feels that your quilt needs and deserves that sort of specialized attention to due you quilt justice, we will be honest with you. Any pricing for these services is between you and the quilter, but you can expect it to be more than the prices listed above.

Prices subject to change. Please contact us for specific pricing on your project.
